

Funding For Arts and Culture

At Nonprofit Arts, our mission is to ensure access to quality arts and culture experiences for everyone. We do this by providing grants to arts organizations and cultural programs that share our passion for the arts and are making an impact in their community. Our grants allow us to fund arts education, free and reduced admission programs, and to commission new art projects and performances.

We understand the important role the arts play in enriching our communities, providing healing to those who need it, and connecting people of diverse backgrounds and identities. We also recognize that many nonprofits are often undeserved and face greater financial burden.

That is why we are committed to creating more equitable access to arts and culture opportunities by increasing and improving our grants program. We will work with communities to build the financial capacity of arts organizations, create and strengthen strategic partnerships, and promote shared success for artists and audiences alike.

We are proud to lead the way in promoting an equitable, vibrant, and inclusive arts community for everyone to experience. Join us in supporting and empowering the creative spirit of artists and arts lovers everywhere. Together, we can build an even stronger culture and community around the arts.
